

# Security Changes for Current SLGSafe Users

## New Use of Credentialing Provider Will Impact How You Log In

### Implementing Changes to Identity Verification at Log In

The Bureau of the Fiscal Service (Fiscal Service) is implementing the Common Approach to Identity Assurance (CAIA) as a credentialing provider to standardize access for its many applications. CAIA enables federated applications to accept user credentials from external Credential Service Providers (CSP). CAIA allows for two different methods of identity verification: 1) Personal Identity Verification (PIV) Card, and 2) ID.me account for SLGSafe system users.

### Adopting Zero Trust Cybersecurity Strategy

Executive Order 14028, Improving the Nation's Cybersecurity, requires Fiscal Service to implement multi-factor authentication in a cloud infrastructure, as part of a sweeping government-wide effort to protect public privacy, the American economy, and trust in the government.

### Accessibility After Implementation

SLGSafe will only be accessible by a 1) PIV Card, or a 2) ID.me account. Username and Password will no longer be accepted for identity verification.

### Maintaining Access Requirement

After CAIA implementation, users are required to log in to SLGSafe every 120 days to maintain access. After 120 days, application access is removed, and users must enroll again to gain access.

### Identity Verification Changes

#### PIV Card Identification Access

SLGSafe users that log in to the system with their PIV Card will continue to be able to do so and are not required to create an account with ID.me.

#### ID.me Identification Access

SLGSafe users that do not have a PIV Card must create an account with ID.me for continued access to SLGSafe. ID.me will require your work email address to be listed as your **primary** email address.

If you do not already possess an ID.me account, you can sign up for one from the SLGSafe login page. Select the ID.me login option and follow the prompts to Create an ID.me account using your work email address, as reflected in SLGSafe.

If you have an existing personal account with ID.me, you will need to add your work email address to your existing account as your **primary** email address. You should not create a new ID.me account for SLGSafe access.

SLGSafe Administrators must gain access to SailPoint IdentityIQ to approve new user access for their organization. The Administrator's Addendum provides additional instructions.
